MOBILE DEVELOPER

I am a highly skilled Android App developer with over 2+ years of experience. I have a passion for crafting exceptional Android applications from the ground up, turning ideas into user-friendly, high-performance mobile experiences.
My dedication to creating sleek, bug-free apps using modern best practices ensures that every project I work on exceeds expectations.

EXPERIENCE

Android Developer   Aug 2022 – Present
Appflix Studio   *New Delhi, India*
Enhanced **CarInfo**, a car services app, adding new features and improving UI/UX for **50M+ installs** and **1M daily active users**. Optimized AdMob for over 5 revenue increase. Developed Flutter module for used car feature.
Add Vehicle Garage, Fastag Recharge, Check Challan features for engaging user and give all solution in App.

Android Developer   July 2021 – July 2022
Nascent Technologies   *Remote, Ahmedabad, Gujarat, India*
Created Govt. survey app for Pune PCMC from scratch using MVVM architecture. Implemented complex SQL schema and sync with server. Developed and published app updates weekly. Completed the Yatradham project within a week.

Android Developer Intern   Sep 2020 – June 2021
FlyingSpark Infotech   *Remote, Mohali, Punjab, India*
Developed news app for Assafir News Channel using WordPress API. Implemented FCM notifications for new articles.

PROJECTS

CarInfo   *Android, Kotlin, Compose, Flutter*   Play Store

- Build and maintain different feature i.e. Fastag, Challan, Insurance, Dashcam etc.
- Bug & ANR fixes and maintain crashlytic to 99.95% with 1M DAU

Daily Gratitude   *Android, Kotlin, GoLang, MongoDB, Docker*   Play Store

- Develop solo web for Quotes and Affirmations in App
- Develop backend in golang for api and host it on AWS

HashPass   *Android, Kotlin, GraphQL, Git*   Source Code

- Created HashPass, an open-source password manager with secure login.
- Backend and database powered by Hasura, using Apollo for GraphQL.
- Designed a user-friendly interface following Material Design.

Kuberam   *Android, Kotlin, Firebase, Git*   Source Code

- Developed Kuberam, an expense tracking app for managing income and expenses.
- Created a modern user interface with Jetpack Compose for a seamless experience.
- Used Auth0 for secure user authentication and Firebase for remote data storage.

QuizZon   *Android, Kotlin Flow, HarperDB, Coroutine*   Source Code

- Created QuizZon, an Android app for creating and playing quizzes on various topics.
- Utilized HardperDB for remote SQL database management, enabling quiz access from anywhere.
- Ensured secure user login and registration with Firebase Authentication.
